Sheetmetal parts are susceptible to slight damage due to the nature of the product and the method of shipment. No credit will be issued for sheetmetal that has small pecks, dings, scratches or other minor flaws. Any body panel (either reproduction or factory original) requires minor body work when installed for a show quality finish.
(Copied permission from Goodmark Ind.)

What is EDP Coated

On many of the sheetmetal panels there will be EDP listed. This stands for Electro-Deposit Primer. This coating is an electronically charged primer that protects parts from dust and corrosion. Parts with an EDP coating are tested for 500 hours under a salt spray solution to check for corrosion. The only surface preparation required is scuffing up the surface for better paint adhesion. No stripping is required. The parts are protected from rust as long as the EDP coat remains under the paint. All Goodmark Industries exclusive sheetmetal items are EDP coated. (Copied with permission from Goodmark Industries.)

Any questions or descriptions on any of our sheetmetal, please call. We will be glad to talk to you or your body shop, directly.

SECRET AUDIO SOUND

Secretaudio is a three piece hidden audio system that offers great flexibility for mounting in any type of vehicle. The main receiver/amplifier unit is usually hidden under the seat, or behind the dash. A 12ft cord from the unit plugs into a LCD display. The small dimensions of the LCD display offer unlimited mounting options. The LCD display can be mounted in the glove box, ash tray, sun visor, console or ? included with the system are a flush mount bezel for console or dash mounting. The third piece to this system is the wireless remote control. The secretaudio SS model remote is a 'RF (radio frequency) remote. With the RF remote you do not have to be in direct line with the display. In fact, you can use the RF remote from up to 40 feet away, and control all functions of the system and even the optional 10 disc changer. The Secretaudio system works exclusively with the custom autosound cd changers. Other brands of changer will not work with this system. This is a 200 Watt AM/FM CD Controller with USB MP3 Flash Drive Player
