SECRET AUDIO SOUND

Secretaudio is a three piece hidden audio system that offers great flexibility for mounting in any type of vehicle. The main receiver/amplifier unit is usually hidden under the seat, or behind the dash. A 12ft cord from the unit plugs into a LCD display. The small dimensions of the LCD display offer unlimited mounting options. The LCD display can be mounted in the glove box, ash tray, sun visor, console or ? included with the system are a flush mount bezel for console or dash mounting. The third piece to this system is the wireless remote control. The secretaudio SS model remote is a 'RF (radio frequency) remote. With the RF remote you do not have to be in direct line with the display. In fact, you can use the RF remote from up to 40 feet away, and control all functions of the system and even the optional 10 disc changer. The Secretaudio system works exclusively with the custom autosound cd changers. Other brands of changer will not work with this system. This is a 200 Watt AM/FM CD Controller with USB MP3 Flash Drive Player
